## **Position Available : Technical Sales Executive Ireland**

CFE the market leader in the supply of pelleting consumable contracts in both Ireland and in the UK, now due to continued expansion are seeking a Technical Sales representative to service our existing client base in Ireland.

This exciting opportunity will encompass two functions:

- (1) technical / process improvement role, and
- (2) a sales / business development role.

The technical / process improvement role will entail advising clients on maintenance schedules, and procedures to minimise equipment failure, process improvement will involve the development and implementation of best practice processing procedures. The sales / business development role will focus on maintaining, developing and growing the companies sales of pelleting consumable contracts in the Irish market.

The ideal candidate will have to be a graduate in process/mechanical engineering with a minimum of two years experience. The role will require the successful candidate to be away from home 1 to 2 nights per week.

We are looking for a results orientated candidate, who can demonstrate a proven track record. Excellent motivation and communication ability are vital together with good computer literacy and administration skills. A full, clean driving licence is also an advantage.

We offer a career opportunity for an ambitious individual to join an expanding company, together with an attractive salary, benefits, credit card and fully expensed company vehicle.
